

Identity with Windows Server 2016

Online-Training | Examen 742

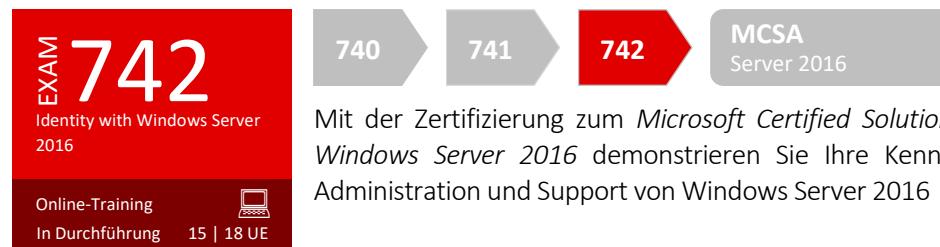

Ausbildungsinhalte

Identity with Windows Server 2016

Mit der Vorbereitung auf das Examen 741 werden Sie auf das dritte und letzte der drei Examens vorbereitet, mit deren Bestehen Sie den Titel *Microsoft Certified Solutions Associate (MCSA) für Windows Server 2016* erlangen.

Ausbildungspfad | Microsoft Certified Solutions Associate (MCSA) für Windows Server 2016

	Online-Training	Dauer	Examen
	Identity with Windows Server 2016	15 UE	742

Dieses Examen vermittelt die grundlegenden Kenntnisse, Active Directory Domain Services (AD DS) in einer verteilten Umgebung bereitzustellen und konfigurieren zu können, Gruppenrichtlinien zu implementieren, Backup und Wiederherstellung durchzuführen sowie Active-Directory-Probleme in Windows Server 2016 beheben zu können. Darüber hinaus wird vermittelt, wie man weitere AD-Serverrollen wie Active Directory Federation Services (AD FS) und Active Directory Certificate Services (AD CS) bereitstellt.

	Unterrichtseinheit	UE 01	742
	Modul 01: Implementieren und Konfigurieren von Domänencontrollern Übersicht über AD DS <ul style="list-style-type: none">✓ Übersicht über AD DS✓ Was ist das AD DS-Schema?✓ Was ist eine AD DS-Gesamtstruktur?✓ Was ist eine AD DS Domäne?✓ Was sind Organisationseinheiten?✓ Welche Neuerungen bietet AD DS in Windows Server 2016✓ Was ist Azure AD?✓ Übersicht der AD DS-Verwaltungsprogramme		

	Unterrichtseinheit	UE 02	742
	Modul 01: Implementieren und Konfigurieren von Domänencontrollern Übersicht der AD DS-Domänencontroller <ul style="list-style-type: none">✓ Was ist ein Domänencontroller?✓ Was ist ein globaler Katalog?✓ Übersicht der SRV-Einträge des Domänencontrollers✓ Anzeigen der SRV-Einträge in DNS✓ AD DS-Anmeldevorgang✓ Was sind Betriebsmaster?✓ Übertragen und Übernehmen von Rollen	Bereitstellen eines Domänencontrollers <ul style="list-style-type: none">✓ Installieren eines Domänencontrollers mithilfe von Server-Manager✓ Installieren eines Domänencontrollers auf einer Server Core-Installation von Windows Server 2016✓ Upgrade eines Domänencontrollers✓ Installieren eines Domänencontrollers von einem Datenträger✓ Klonen von Domänencontrollern✓ Bewährte Methoden für die Domänencontrollervirtualisierung	

	Unterrichtseinheit	UE 03	742
	<p>Module 2: Managing objects in AD DS</p> <p>Managing user accounts</p> <ul style="list-style-type: none"> ✓ Creating user accounts ✓ Configuring user account attributes ✓ Managing user accounts ✓ Creating user profiles ✓ Managing inactive and disabled user accounts ✓ User account templates ✓ Using templates to manage accounts <p>Managing groups in AD DS</p> <ul style="list-style-type: none"> ✓ Group typesGroup scopes ✓ Implementing group management ✓ Managing group membership by using Group Policy 	<p>Managing groups in AD DS</p> <ul style="list-style-type: none"> ✓ Default groups ✓ Special identities ✓ Managing groups in Windows Server <p>Managing computer objects in AD DS</p> <ul style="list-style-type: none"> ✓ What is the Computers container? ✓ Specifying the location of computer accounts ✓ Controlling permissions to create computer accounts ✓ Joining a computer to a domain ✓ Computer accounts and secure channels ✓ Resetting the secure channel ✓ Performing an offline domain join 	

	Unterrichtseinheit	UE 04	742
	<p>Module 2: Managing objects in AD DS</p> <p>Using Windows PowerShell for AD DS administration</p> <ul style="list-style-type: none"> ✓ Using Windows PowerShell cmdlets to manage user accounts ✓ Using Windows PowerShell cmdlets to manage groups ✓ Using Windows PowerShell cmdlets to manage computer accounts ✓ Using Windows PowerShell cmdlets to manage OUs ✓ What are bulk operations? ✓ Using graphical tools to perform bulk operations ✓ Querying objects with Windows PowerShell ✓ Modifying objects with Windows PowerShell ✓ Working with CSV files ✓ Performing bulk operations with Windows PowerShell <p>Implementing and managing OUs</p> <ul style="list-style-type: none"> ✓ Planning OUs ✓ OU hierarchy considerations ✓ Considerations for using OUs ✓ AD DS permissions ✓ Delegating AD DS permissions ✓ Delegating administrative permissions on an OU 		

	Unterrichtseinheit	UE 05	742
	<p>Module 3: Advanced AD DS infrastructure management</p> <p>Overview of advanced AD DS deployments</p> <ul style="list-style-type: none"> ✓ Overview of domain and forest boundaries in an AD DS structure ✓ Why implement multiple domains? ✓ Why implement multiple forests? ✓ Deploying a domain controller in Azure IaaS ✓ Managing objects in complex AD DS deployments 	<p>Deploying a distributed AD DS environment</p> <ul style="list-style-type: none"> ✓ AD DS domain functional levels ✓ AD DS forest functional levels ✓ Deploying new AD DS domains ✓ Installing a domain controller in a new domain in an existing forest ✓ Upgrading a previous version of AD DS to Windows Server 2016 ✓ Migrating to Windows Server 2016 AD DS from a previous version ✓ Considerations for implementing complex AD DS environments 	

	Unterrichtseinheit	UE 06	742
	<p>Module 3: Advanced AD DS infrastructure management</p> <p>Configuring AD DS trusts</p> <ul style="list-style-type: none"> ✓ Overview of different AD DS trust types ✓ How trusts work in a forest ✓ How trusts work between forests ✓ Configuring advanced AD DS trust settings ✓ Configuring a forest trust 	<p>Module 4: Implementing and administering AD DS sites and replication</p> <p>Overview of AD DS replication</p> <ul style="list-style-type: none"> ✓ What are AD DS partitions? ✓ Characteristics of AD DS replication ✓ How AD DS replication works within a site ✓ Resolving replication conflicts ✓ How replication topology is generated ✓ How SYSVOL replication works 	

	Unterrichtseinheit	UE 07	742
	<p>Module 4: Implementing and administering AD DS sites and replication</p> <p>Configuring AD DS sites</p> <ul style="list-style-type: none"> ✓ What are AD DS sites? ✓ Why implement additional sites? ✓ How replication works between sites ✓ What is the ISTG? ✓ Overview of SRV records ✓ How client computers locate domain controllers within sites ✓ Moving domain controllers between sites 	<p>Module 4: Implementing and administering AD DS sites and replication</p> <p>Configuring and monitoring AD DS replication</p> <ul style="list-style-type: none"> ✓ What are AD DS site links? ✓ What is site link bridging? ✓ What is universal group membership caching? ✓ Managing intersite replication ✓ Tools for monitoring and managing replication 	

	Unterrichtseinheit	UE 08	742
	<p>Module 5: Implementing Group Policy</p> <p>Introducing Group Policy</p> <ul style="list-style-type: none"> ✓ What is configuration management? ✓ Overview of Group Policy tools and consoles ✓ Benefits of using Group Policy ✓ Group Policy Objects ✓ Overview of GPO scope ✓ Overview of GPO inheritance ✓ The Group Policy Client service and client-side extensions ✓ New features in Group Policy in Windows Server 2016 	<p>Module 5: Implementing Group Policy</p> <p>Implementing and administering GPOs</p> <ul style="list-style-type: none"> ✓ What are domain-based GPOs? ✓ GPO storage ✓ What are starter GPOs? ✓ Common GPO management tasks ✓ Delegating administration of Group Policy 	

	Unterrichtseinheit	UE 09	742
	<p>Module 5: Implementing Group Policy</p> <p>Group Policy scope and Group Policy processing</p> <ul style="list-style-type: none"> ✓ What are GPO links? ✓ Linking GPOs ✓ Group Policy processing order ✓ Configuring GPO inheritance and precedence ✓ Using security filtering to modify Group Policy scope ✓ What are WMI filters? 	<p>Module 5: Implementing Group Policy</p> <p>Group Policy scope and Group Policy processing</p> <ul style="list-style-type: none"> ✓ Filtering Group Policy application ✓ How to enable or disable GPOs and GPO nodes ✓ Loopback policy processing ✓ Considerations for slow links and disconnected systems ✓ Identifying when settings become effective 	

	Unterrichtseinheit	UE 10	742
	<p>Module 5: Implementing Group Policy</p> <p>Troubleshooting the application of GPOs</p> <ul style="list-style-type: none"> ✓ Refreshing GPOs ✓ What is RSoP? ✓ Generating RSoP reports ✓ Performing a what-if analysis with Group Policy Modeling Wizard ✓ Examining Group Policy event logs ✓ Detecting Group Policy health issues <p>Module 6: Managing user settings with Group Policy</p> <p>Implementing administrative templates</p> <ul style="list-style-type: none"> ✓ What are administrative templates? ✓ What are .adm and .admx files? ✓ Overview of the central store ✓ Importing security templates ✓ Managing administrative templates 	<p>Module 6: Managing user settings with Group Policy</p> <p>Configuring Folder Redirection, software installation, and scripts</p> <ul style="list-style-type: none"> ✓ What is Folder Redirection? ✓ Settings for configuring Folder Redirection ✓ Security settings for redirected folders ✓ Managing software with Group Policy ✓ Group Policy settings for applying scripts <p>Configuring Group Policy preferences</p> <ul style="list-style-type: none"> ✓ What are Group Policy preferences? ✓ Comparing Group Policy preferences and Group Policy settings ✓ Features of Group Policy preferences ✓ Item-level targeting options 	

	Unterrichtseinheit	UE 11	742
	<p>Module 7: Securing Active Directory Domain Services</p> <p>Securing domain controllers</p> <ul style="list-style-type: none"> ✓ Security risks that can affect domain controllers ✓ Modifying the security settings of domain controllers ✓ Implementing secure authentication ✓ Securing physical access to domain controllers ✓ What are RODCs? ✓ Deploying an RODC ✓ Planning and configuring an RODC password replication policy 	<p>Module 7: Securing Active Directory Domain Services</p> <p>Securing domain controllers</p> <ul style="list-style-type: none"> ✓ Configuring a password replication policy ✓ Separating RODC local administration ✓ What are Group Policy preferences? ✓ Comparing Group Policy preferences and Group Policy settings ✓ Features of Group Policy preferences ✓ Item-level targeting options 	

	Unterrichtseinheit	UE 12	742
	<p>Module 7: Securing Active Directory Domain Services</p> <p>Implementing account security</p> <ul style="list-style-type: none"> ✓ Account security in Windows Server 2016 ✓ Password policies ✓ Account lockout policies ✓ Kerberos policies ✓ Configuring domain account policies ✓ Protecting groups in AD DS ✓ Fine-grained password and lockout policies 	<p>Module 7: Securing Active Directory Domain Services</p> <p>Implementing account security</p> <ul style="list-style-type: none"> ✓ Tools for creating PSOs ✓ Configuring a fine-grained password policy ✓ PSO precedence and resultant PSO ✓ Account-security options in Windows Server 2016 ✓ Configuring user account policies ✓ Enhancing password authentication with Windows Hello and MFA 	

	Unterrichtseinheit	UE 13	742
	<p>Module 7: Securing Active Directory Domain Services</p> <p>Implementing audit authentication</p> <ul style="list-style-type: none"> ✓ Account logon and logon events ✓ Configuring authentication-related audit policies ✓ Scoping audit policies ✓ Viewing logon events 	<p>Configuring managed service accounts</p> <ul style="list-style-type: none"> ✓ Overview of service accounts ✓ Challenges of using service accounts ✓ Overview of managed service accounts ✓ What are group MSAs? ✓ Configuring group MSAs ✓ SPNs and Kerberos delegation 	

	Unterrichtseinheit	UE 14	742
	<p>Module 8: Deploying and managing AD CS</p> <p>Deploying CAs</p> <ul style="list-style-type: none"> ✓ What is AD CS? ✓ Options for implementing CA hierarchies ✓ Standalone vs. enterprise CAs ✓ Considerations for deploying a root CA ✓ Deploying an enterprise root CA ✓ Considerations for deploying a subordinate CA ✓ How to use the CAPolicy.inf file for installing a CA 	<p>Administering CAs</p> <p>Lesson 3: Troubleshooting and maintaining CAs</p> <ul style="list-style-type: none"> ✓ Managing CAs ✓ Configuring CA security ✓ Security roles for CA administration ✓ Configuring CA policy and exit modules ✓ Configuring CDPs and AIA locations ✓ Configuring CA properties

Optimale Prüfungsvorbereitung

Für die optimale Vorbereitung auf das Microsoft-Examen, empfehlen wir die IT-Prüfungsvorbereitungs-Plattform CertBase, die Sie unter www.CertBase.de aufrufen können. In diesem Portal werden Fragen bereitgestellt, die den Original Microsoft Prüfungen gleichen und mit deren Hilfe Sie Ihre Chancen auf ein erfolgreiches Bestehen der gewünschten Prüfung deutlich steigern.

Microsoft Test- und Demoumgebungen

Unter der Adresse www.mycontoso.de finden Sie eine Auswahl an Werkzeugen zur Demonstration aktueller Microsoft-Produkte und Services. Diese vorkonfigurierten Demoumgebungen aus der Microsoft Demonstration Plattform eignen sich auch sehr gut für administrative Übungszwecke.

Sie haben Fragen oder Anregungen?

Falls Sie Fragen, Wünsche oder Anregungen zu dieser oder zu anderen Ausbildungen haben, stehen wir Ihnen montags bis donnerstags in der Zeit von 08:00 – 17:00 Uhr und freitags von 08:00 – 13:00 Uhr sehr gerne zur Verfügung.
